Statement Concerning Covid-19 (Coronavirus)

Gamse's commitment to the wellbeing of our employees and providing exceptional service to our customers includes ongoing communication. At this time, we do not foresee any impact on our ability to supply our customers from the recent coronavirus outbreak. We will share any updates as we continue to evaluate supply chain disruptions related to the epidemic.

Gamse's raw material supply chain is designed to provide our manufacturing plants business continuity. Raw materials are sourced primarily from domestic suppliers and include supply redundancy for all mission-critical raw materials.

While we do employ a global sourcing strategy, our domestic suppliers' production capacity is sufficient to rapidly address our full demand. Gamse will continue to engage regularly with our suppliers to assess upstream impacts. We do not view this situation as a one-time event, but one that requires continued vigilance.

As our manufacturing operation is domestic, we currently do not perceive any interruptions associated with our workforce. However, we are monitoring the situation closely and adapting our policies and procedures in accordance with the recommendations of the Center for Disease Control and Prevention.

Thank you for your continued trust in Gamse, and we look forward to continuing to support your organization's success in the months and years ahead.

Sincerely,

A handwritten signature in black ink, appearing to read 'Matt Haynes', is positioned below the word 'Sincerely,'.

Matt Haynes
